DETAILED ACTION

Response to Amendment

This Office Action is in response to applicant's amendment filed on August 29, 2005.

Claims 1, 3-5, and 12 have been amended. Claims 6-8, 14, and 15 have been cancelled. Claims 16-25 are newly added claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Namely, metacarpal unit internal pad (35) currently stand indefinite because claim 1 does not specifically recite how, structurally, this metacarpal unit internal pad (35) is related to the external casing.

Claim 16 recites the limitation "said shell" in line next to last line. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3772

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1, 3-5, 12, 13, 16, 18-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosenblatt (U.S. Patent No. 5,662,594). Rosenblatt discloses an orthosis comprising a first member (12) having a support shell (14), a cushion pad (18) positioned along inner surface of support shell (14), and straps (22), and apertures (38, 39); a lower member (80) having liner (86) and attachment step ridge (88); a hinge/control device (10) connecting the first member (12) to the lower member (80), the hinge/control device (10) having a plurality of apertures (49, 50, 62, 64).

Allowable Subject Matter

Claims 2, 9-11, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
